

Anderson Counseling

April 24, 2015

To Whom It May Concern:

I am writing in support of Samara Kezele Fritchman LMHC. I have only known Samara since March of this year but I have been impressed with her credentials and the way she presents herself. I have been in the mental health field for over forty years and have interviewed many therapists in my former position as the director of a children's mental health center. I have found that education and experience are not the only variables that separate the quality therapists from those who are likely to have difficulty really connecting with their clients. Although Samara's education and experience are impressive, her ability to relate in a caring and supportive manner would separated her from other job applicants if I was actually interviewing her for a position in our clinic.

I have volunteered to assist Samara by sharing office space with her and giving her some updated information regarding insurance and EAP paperwork and billing processes. I have no reservations in recommending Samara for inclusion in insurance and EAP panels.

If I can be of additional information, please feel free to contact me at the above address and phone number.

Sincerely

Gerald Anderson LMHC
