Re: Letter of Support Regarding Dr. Samara Fritchman

To Whom It May Concern:

I am writing to express my appreciation for the quality and comprehensiveness of information presented by Dr. Samara Fritchman in her Ethics for Mental Health Professionals Seminars. I first attended one of her Ethics seminars in 2012. As part of this seminar she offered a CD of treatment interventions for different diagnoses which I was able to use in building our program's electronic medical records for behavioral health. It was very comprehensive and clinically helpful. She offered during the seminar to respond to questions from participants at a later time and was in fact quick to respond to a question I sent her following the seminar.

Most recently, I attended her Ethics for Mental Health Professionals on 5/16/20. Once again, I was impressed by the comprehensiveness of the material she presented, as well as her generous offer to respond to questions of participants after the seminar. I did have two different questions which I emailed to her and received her responses in a quick and helpful manner. As in her earlier seminar, she offered a great deal of information by Addendum available to participants. Her dual training in both law and mental health bring a great breadth to her knowledge.

I would highly recommend her seminar to anyone in the mental health field. She is a tremendous and generous resource.

Sincerely,

Anita Treloar La Cour, Ph.D.
