2022 ICD-10-CM

COVID-19 Update

In response to the ongoing national emergency concerning COVID-19, the Centers for Disease Control and Prevention's (CDC) National Center for Health Statistics (NCHS) is implementing 3 new diagnosis codes, Z28.310, Z28.311 and Z28.39, into the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), for reporting COVID-19 vaccination status effective April 1, 2022.

The files in the Downloads section below contain information on the ICD-10-CM updates effective with discharges on and after April 1, 2022.

The 2022 ICD-10-CM files below contain information on the ICD-10-CM updates for FY 2022. These 2022 ICD-10-CM codes are to be used for discharges occurring from October 1, 2021 through September 30, 2022 and for patient encounters occurring from October 1, 2021 through September 30, 2022.

Note:

There is no FY 2022 GEMs file. As stated in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49388), the GEMs have been updated on an annual basis as part of the ICD-10 Coordination and Maintenance Committee meetings process and will continue to be updated for approximately 3 years after ICD-10 is implemented.

We made the GEMs files available for FY 2016, FY 2017 and FY 2018.

An announcement was also made at the September 2017 ICD-10 Coordination and Maintenance Committee meeting that FY 2018 would be the last GEMs file update.
