

<https://www.sprucehealth.com>

After you sign a Business Associate Agreement (BAA) with Spruce, any communication that occurs entirely on Spruce (app-to-app messaging with providers or patients, telemedicine within a secure messaging thread) is inherently secure, encrypted, and compliant with the technical requirements of HIPAA. Spruce is the leading platform for HIPAA-compliant communication and care outside of the exam room. Call, text, fax, secure message, video chat, and more—all from one secure app, with a unified team inbox. Spruce is a cloud-based telemedicine platform designed to help healthcare professionals and clinics communicate with patients via text, video or audio communication. Key features include workflow automation, secure file sharing, rotation scheduling, call forwarding, electronic payments, analytics, and reporting.

All-in-one healthcare communication

Whether it's upgrading your patient experience or modernizing your communication toolkit, see why Spruce is the leading platform for HIPAA-compliant healthcare communication.

Communication

All your communication channels, all in one place
