This textbook is designed specifically for community college's and university's social service, mental health psychology programs. Samara has spoken nationally for many years on the topics relevant to ethics and mental health. This book will help you sort out facts from fiction, ethical standards from legal issues, and their practical applications in clinical practice. You will gain an understanding of and an appreciation for the purpose and necessity of ethical standards. Competence, within the field of counseling psychology, is important because the information available to practicing counselors is constantly growing and changing. This makes competency a lifelong career goal that is never quite satisfied. Also, attention to cultural and diversity issues have clearly been articulated into ethical standards. Understanding multiculturalism is critical for counselors. Values, principles, and ethical standards define a counselor's practice and must remain consistent with ethical guidelines.

ETHICAL STANDARDS

The Ethical Practitioner, Key Ethical Issues, History and Relevance, Ethical Codes and Laws, Moral Principles, Standard of Care, Boundary Crossing, Boundary Violations, Cultural Competence, Informed Consent, Confidentiality Exceptions, Confidential Expectations, Technology and Ethics, Therapeutic Interventions, Professional Boundaries, Minors, Questionable Therapy, Unethical Counseling, Multiculturalism, Social Diversities, Suicide & Homicide Risks, Counseling Relationships, and many more topics...

CLINICAL FORMS
